JavaScript · TypeScript · React · Redux · Redux-Saga · HTML & CSS · SCSS · AngularJS · Backbone.js · jQuery · Java / J2EE · Spring MVC · REST & JSON · Jasmine · Git · Responsive UI · Mentoring · Agentic AI

PROFESSIONAL EXPERIENCE

Versa Networks Inc. — Principal Engineer · Frontend

August 2017 – Present | San Jose, California

Versa Director & Versa Concerto

Built network configuration and monitoring interfaces with React, Redux, Redux-Saga and TypeScript. Collaborated with product and UX/UI teams, designed request and response data structures, integrated frontend and backend services, supported QA, and developed proofs of concept.

Vidder Inc. — Senior Software Engineer

March 2016 – July 2017 | Campbell, California

PrecisionAccess Admin

Developed AngularJS interfaces for server configuration, integrated backend services, wrote Jasmine tests, investigated defects, and created Ubuntu base systems with Packer.

CipherCloud — Senior Frontend Engineer

May 2014 – February 2016 | San Jose, California

Cloud Discovery

Built cloud application monitoring and data loss prevention interfaces with Backbone.js and Underscore. Developed Spring MVC middleware, integrated services, wrote Jasmine tests, and contributed to proofs of concept.

VMware — Senior Frontend Engineer

October 2013 – April 2014 | San Jose, California

Subscription portal

Built and maintained subscription portal pages, implemented frontend changes, designed UI data structures, integrated services, and collaborated with QA and a team in India.

Cisco Inc. — Senior Software Engineer

March 2010 – October 2013 | San Jose, California

Pismo · SUI · Cisco Pulse

Developed enterprise video and expertise-search interfaces, reusable JavaScript libraries, upload and transcoding workflows, and responsive pages. Presented sprint demos, mentored new hires, reviewed code, and supported candidate interviews.

FlairIT Solution · Cisco engagement — Senior Frontend Developer

June 2008 – March 2010 | Novi, Michigan / San Jose, California

Cisco ETG business unit

Contributed to system analysis, design, development, testing and integration. Developed enterprise OpenSocial gadget management and led JavaScript and CSS implementation.

UIT Consultant — Consultant Software Engineer

June 2007 – March 2008 | Ann Arbor, Michigan

Online auditing and scheduling information system

Designed and developed frontend and backend features, a complex Ajax scheduling calendar, Oracle PL/SQL stored procedures and jobs, and supported investigation and defect resolution.

Ublys Corp — Java Developer

April 2006 – May 2007 | Makati, Philippines

Trading · Supply chain · Relocation · Online stores

Contributed across requirements, architecture, design and implementation. Led client data gathering and analysis, and developed Java/J2EE products.

DL Resources Pte Ltd — Programmer Analyst

April 2005 – April 2006 | Singapore

Crimson Logic customs releasing system

Developed Java/EJB backend components and JSP, Servlet and JavaScript interfaces. Created test tools, plans and data, and tested and debugged application modules.

GE – GXS — Java Developer

July 2000 – July 2001 | Philippines

Settlement system

Developed UI modules with JavaScript, HTML and XML/XSL, contributed to system analysis with Rational Rose, integrated frontend and backend components, and deployed to NetDynamics on Unix.

Teligent Systems — Technical Consultant

1997 – July 2000; August 2001 – March 2005 | Philippines

Enterprise Java systems

Developed Java/EJB backend components and web interfaces with JSP, Servlets and JavaScript.
